Summary

Full-stack developer (TypeScript, React, Node.js, PostgreSQL) building production platforms on Cloudflare and AWS, with experience in real-time systems, access control, and document processing. Seeking remote full-stack or backend roles.

Experience

Associate Full Stack Developer, Openthrive – Bangalore Mar 2026 – Present

- Built the registry and CLI for **cxful**, an internal component library: component code is hosted in a registry on Cloudflare Workers and installed with a single CLI command. Developed the components together with the team.
- Contributed to **HaulersClub**, a job platform for US truck drivers, as part of a team: built the real-time messaging module (PartyKit, Cloudflare Durable Objects), driver license extraction with Amazon Textract, and an API that onboards carriers from a DOT number using FMCSA data.
- Independently building **Heapgrid**, a collaborative outline-style docs tool with cross-organization project sharing and fine-grained access control. Also built and maintain the CEO's profile site on Sanity CMS.

Software Engineer – Internship, Lamzing Technologies Pvt. Ltd. – Imphal Apr – Aug 2025

- Built a headless CMS blogging platform with Strapi (Node.js) and React, and integrated REST APIs in Agile cycles.

Projects

AI-Powered RFP Management System – [GitHub] 2026

- Full-stack procurement platform with conversational AI for natural language RFP creation, automated vendor emails, and proposal parsing using Google Gemini (React, Node.js, PostgreSQL, Prisma).

RandomHub – randomhub.app 2025

- Launched a platform with 15+ client-side tools (Next.js, TypeScript, Cloudflare Pages), attracting 200+ monthly users through SEO optimization.

E-commerce Website (Freelance) – ecom-clover.pages.dev 2025

- Full-stack store with OTP authentication, transactional emails, Redis caching, and Cloudflare R2 image storage (React, Hono, PostgreSQL, Cloudflare Workers).

Education

Bachelor of Engineering in Computer Science Aug 2021 – May 2025
Manipur Institute of Technology Manipur, India

Awards

Robert Memorial Internship Award, MaolKeki Foundation (selected through a competitive interview process; featured in regional news) Jul 2025

Skills

Languages: JavaScript, TypeScript, Python
Frontend: React, Next.js, Astro, Tailwind CSS, Redux
Backend: Node.js, Express.js, Hono, Strapi, Sanity, WebSockets/Socket.io, PartyKit, Durable Objects, RESTful APIs, LLM Integration
Databases: PostgreSQL, MongoDB, Redis
Cloud & DevOps: Cloudflare (Pages, Workers, R2, Durable Objects), AWS (EC2, S3, Textract), Docker, Vercel, Render, GitHub Actions, Git
